To whom it may concern,

RE: Bartłomiej Zawadka

I confirm that Bartłomiej Zawadka has been employed as Software Engineer by First Utility from 1st November 2010.

Their job of Software Engineer carries the following responsibilities; developing and testing new systems and extensions to the existing systems. Bartłomiej works within an agile scrum team with a focus on test driven development and continuous integration. The main technology set used is Java, with RESTful interfaces implemented in Jersey, Dependency Injection implemented through CDI, and data access to Postgres through JPA. However Bartłomiej has been exposed to varying technologies while working here including, but not limited to, Portlets, Ruby and mobile development.

I would happily re-employ Bartłomiej as I consider him to have strong technical ability and excellent communication skills which have helped him become a valued member of our team.

Yours sincerely,

Paul Spurr
